

LAKSHMIPAT SINGHANIA ACADEMY
12-B ALIPORE ROAD, KOLKATA 700 027

Dear Parents,

Students have always attended after school and weekend sports lessons, creative crafts, and foreign languages or participated in sessions that teach various forms of arts as complementary activities. The proliferation of apps and the technology that drives them has seen recognition amongst IT industry experts and educators about the need to instill basic knowledge about programming languages to young learners so that they become digitally literate. The Robotics programme is aimed at students who are enthusiastic about animation movies and video games and spend a good amount of time using computers. Students can learn logic through game programming that would stretch their brain muscle in different directions. Here the students will do some gaming, computer programming, movie making, and much more!

In this connection, we will be starting a Robotics club w.e.f. **June 19th, 2017 (Monday)**

Details for the Robotics club are given below:

1. Maximum 20 students per group
Group 1 – Class I & II
Group 2 – Class III to V
Group 3 – Class VI to VIII
Group 4 – Class IX – XII
2. Enrolment fees – one time – Rs.250/-
3. Quarterly fees – June – August – Rs.2,200/-
September – November – Rs.2,200/-
December – February – Rs.2,200/-

As there are only 20 seats per group, students inclined towards Robotics and interest for programming would be given priority for this activity.

For further details, kindly refer to circular No. 13 for 'beyond school coaching'.
